

Ride-Side Berm

Secondary Containment for Vehicles

Specifically designed for vehicles, the Drive-Over Berm's collapsible walls will allow vehicles to enter and exit without manual assistance. Ideal for vehicle washdown or decontamination, remote site refuelling or temporary secondary containment around tanker trucks, the rugged design of the Drive-Over Berm will allow it to be used in the toughest environments.

Features

- Collapsible hands-free flotation walls allow even heavy tracked vehicles to repeatedly enter and exit the berm without manual setup. The unique flotation walls will become erect as liquid fills the berm.
- L-Rod side walls allow operators to quickly setup the berm and provide rigid support for the non-collapsible walls
- The Drive-Over Berm's fully collapsible design allows the berm to be stored and setup quickly without tools
- Eyelet patches along all sides of the berm allow for use with stakes for long term use in rugged terrain
- Drains in all four corners allow the berm to be gravity drained quickly through a water filter system or during cleaning

Options

- **Mini-Ramps:** allow vehicles to exit the berm while liquid is inside the berm
- **RainDrain™:** removes hydrocarbons and additives from captured water through gravity drainage
- **Track Belting:** protects the Drive-Over Berm from heavy tracked vehicles and extends the berms life
- **Arctic-Shield:** chemical resistant fabric for temperatures to -50 degrees Fahrenheit

Specifications

Model	Capacity		Inside Dimensions	
	USG	Litres	Feet. In.	Meters
152015	2800	10,600	15' x 20' x 15"	5 x 6.6 x .4
202015	3740	14,150	20' x 20' x 15"	6.6 x 6.6 x .4
302015	5610	21,230	30' x 20' x 15"	10 x 6.6 x .4
402015	7480	28,310	40' x 20' x 15"	13.3 x 6.6 x .4
502015	9350	35,390	50' x 20' x 15"	16.6 x 6.6 x .4
