

Stilwell Flyer

Helicopter Transportable Water Cell

Effective on remote, steep sloped terrain, the Stilwell Flyer is transportable by helicopter with long line delivery. The tetrahedron shape of the Stilwell eliminates twisting and residual bounce in flight.

Available for standard water or potable water, the Stilwell Flyer ensures safe transport of water to crews in remote locations.

The Stilwell Flyer can be slung from helicopters in configurations of one or more

Features

- Constructed of durable, rugged and flexible fabric that is mold and mildew resistant
- Includes one ea. fill and drain ports for quick filling and discharge
- Compact for easy storage
- Easy to clean and repair
- Fabric available for potable water use (drinking water) or standard water use (not for human consumption)

Specifications
